DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A complete and proper composition claim must recite a carrier, otherwise it is just a compound claim. These claims lack it.

Claims 1 and 3-10 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for most R1 choices, does not reasonably provide enablement for R1 = haloalkyl. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

The halo itself is a leaving group which will prevent synthesis as indicated. Thus, suppose R1 were, and the claim 7 process were done with e.g. X=I, which is one of the preferred X choices. The formula II compound would thus be CH₂I₂. That compound will obviously not give the desired -CH₂I derivative, but will instead give the dimer linked by methylene.

Specification

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

Table 2 is objected to because it has mixed landscape and portrait orientation. Applicants must pick one or the other.

Claim Objections

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
